SUMMARY

Full-stack MERN developer with practical experience developing responsive and scalable web applications with React, Next.js, and Node.js. Experience with building cleaner and more intuitive user interfaces, secure REST APIs, and production-ready features.

PROJECTS

1. PlanOra – Task Management App [GitHub](#) [Live](#)

- Developed a task management application using React, Node.js, MongoDB and Express.js
- Developed JWT and Google Authentication for securing the login process.
- Facilitated specific tasks within projects as well as tasks filtering.
- Developed a responsive UI to ensure seamless productivity on all devices.

2. Deskio – E-commerce Admin Panel & User Management [GitHub](#)

- Created a fully functional e-commerce admin interface using Next.js, Node.js, and PostgreSQL.
- Implemented user authentication system, role-based security, and account management.
- Managed products, orders, and inventory with the help of dynamic dashboards.
- Designed a responsive and intuitive interface for seamless admin activity.

EXPERIENCE

Hands-On Development Experience

- Developed multiple full-stack applications following industry practices
- Worked with REST APIs, authentication, and database schemas
- Used GitHub for version control and collaboration
